

TAMARA

Superior design complemented
in resin technology

Profiled circular form provides superior elegance and sophistication.

All the components for the resin pool structure are molded by an injection process that enables us to reinforce everyone of these components.

Synflex resin bottom rails come with exterior shields giving them strength.

Your above ground pool has been designed to provide you with years of safe, family fun. This entails that water safety must always be taken into account. When used incorrectly, your above ground swimming pool can be dangerous; above ground pools are shallow, and this makes diving and jumping unsafe. To ensure your above ground pool is used safely you must observe the safety precautions that are provided to you when you purchase an above ground pool and conform to all local regulations. © Copyright 2015

-enjoy your pool without losing your yard

Ledge covers perfectly adjust to the upright while ensuring the pool has a circular orientation.

FIESTA wall pattern is a fluid design matching the Champagne structure.

Pillars of the pool structure, the uprights are reinforced with embossed patterns that insure stabilization of the top ledge.

When it is hot outside, nothing beats wading in the cool waters of your above ground pool.

The **Resin Series** brings you innovative technology and incredible endurance that will win your heart as the ideal fusion of high technology and impeccable style. Resin injection molding is a revolutionary process that eliminates corrosion risks and guarantees long-term dependability. Transform your backyard into an everyday vacation.
